

the common denominator for better business

SpringBoard's mission is to build the capacity of creative entrepreneurs to develop sustainable ventures.

SpringBoard's programs:

Guide entrepreneurs through the basics of starting their own business.

Invest in small business using innovative financial strategies.

Connect industry experts with entrepreneurs to discuss emerging business trends.

Build active relationships between local CEOs to stimulate corporate growth.

Business Planning

1 + 1 = Business Basics

Committed to the power of creativity in economic development, SpringBoard offers entrepreneurs an 8-week Business Planning Course that enables participants to build a comprehensive business plan, learn valuable skills and receive constructive feedback.

Matched Savings

Creative Financing, Multiplied

In the interest of supporting micro-enterprise, this incentive assists local entrepreneurs struggling to overcome financial obstacles that prevent the startup or expansion of their business. Matched Savings accounts enable individuals with low to moderate income to multiply their personal investment in a business.

Panel Discussions

Adding Insight to the Equation

In the "sink or swim" small-business environment, it is critical that entrepreneurs stay ahead of emerging business trends. Panel Discussions are led by industry experts and are offered quarterly.

Peer Roundtables

Strength in Numbers

Business doesn't happen in a vacuum. Peer Roundtables are a series of twelve monthly meetings for CEOs of businesses that exceed half a million dollars in annual revenue. At each Roundtable, a moderator guides discussions between twelve local CEOs, from non-competing industries, that focus on driving innovation and solving problems.
